1. How to download materials from TPP

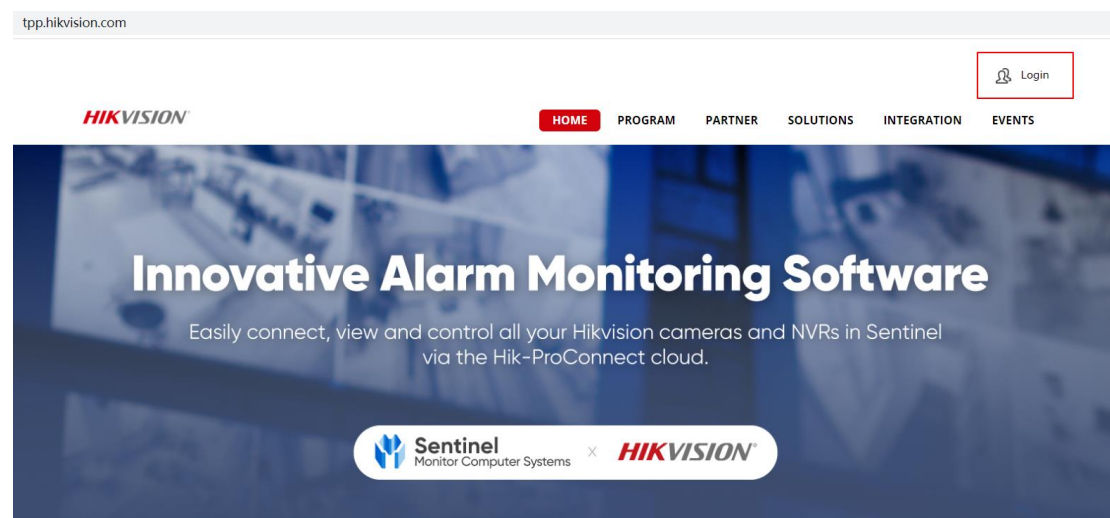

For integration projects, you should go to the TPP portal to download the materials.

1.1 Registration

You can log into TPP portal and see relevant information only after registering an account.

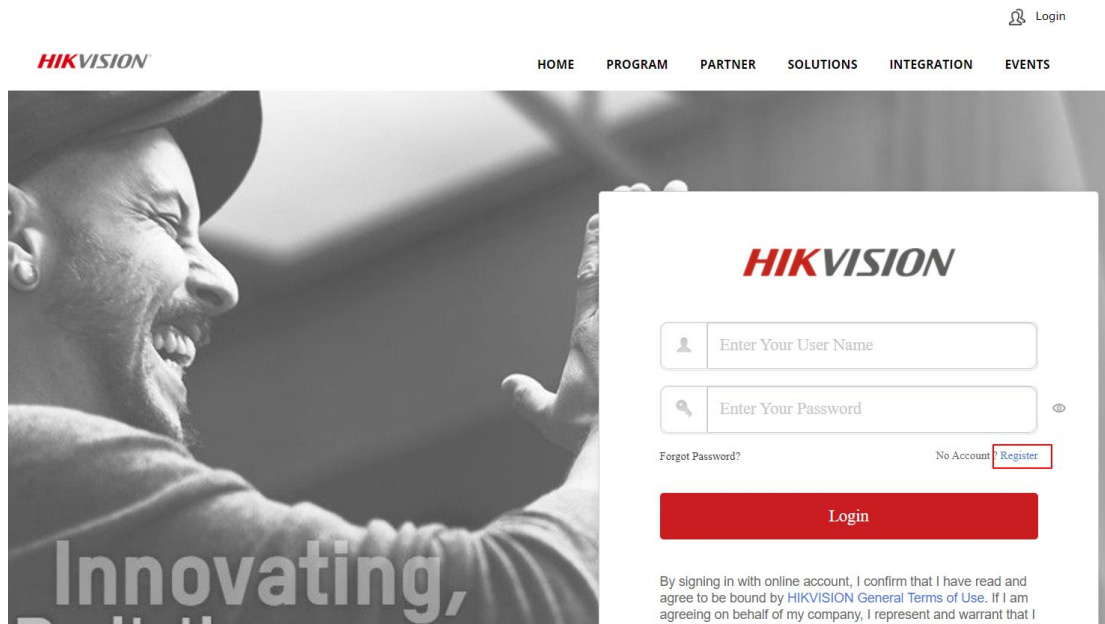

Link as below: <https://tpp.hikvision.com/>.

The home page is like this.

PARTNER SPACE

Click the login button in the upper right corner to enter the login page. If you do not have an account, you need to click Register below to register the account.

After accepting privacy policy, go to the information filling page. You need to fill in customer information carefully and in detail, which is very helpful for our customer statistics and integration problems in the future. In particular, the email must be a real email address, because The TPP email of account activation will be sent to this email address. If the email is not real, you will not receive the activation email.

INTEGRATION CENTER

Click the "Search the ISAPI Developer Guide" and enter the page of downloading ISAPI. Then you can search the ISAPI document for different products. Noted, you can input the model of the device or the key words.

Downloading for HCP OpenAPI:

Hikcentral Software Group is the OpenAPI installation package of HCP. Note that there are only installation packages here. The API documents of OpenAPI are in the installation package and can be found in the installation directory after installation. 'How to' document is a guide document for users to know how to use OpenAPI. You can download it together.

2. How to get technical support on TPP

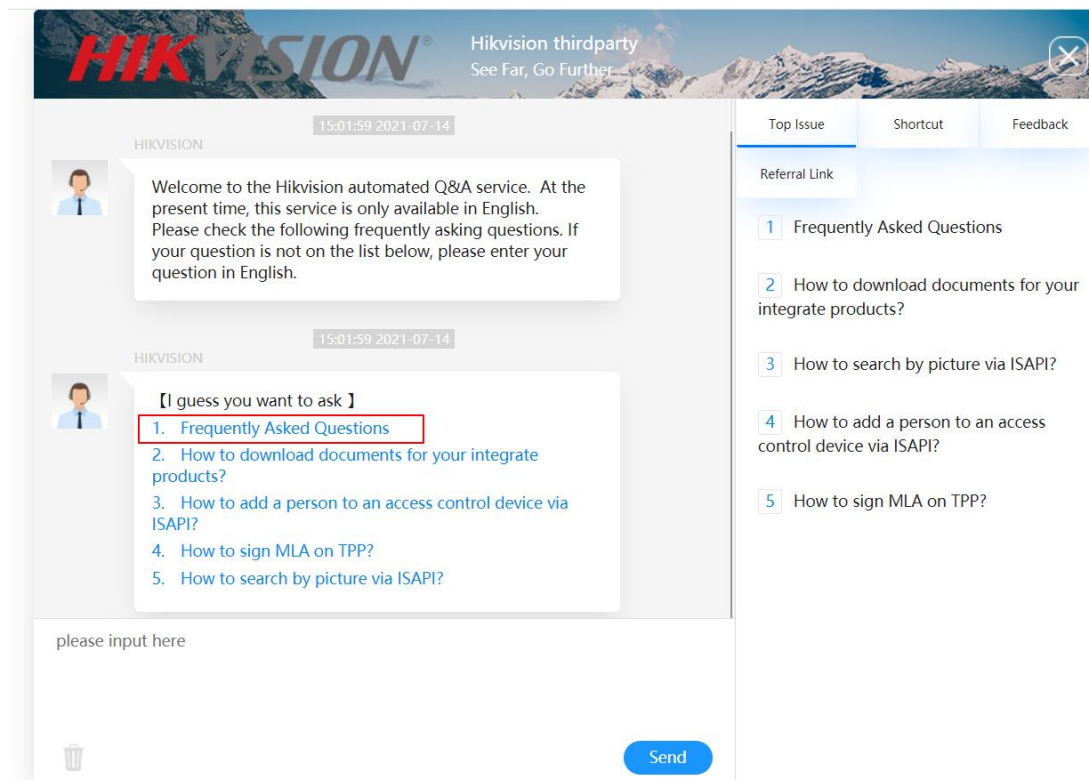

You might face problems during integration process. Currently, Hikvision will provide several different support methods. However, at present, we highly recommend online support, which is strongly promoted by Hikvision.

2.1 Online Support

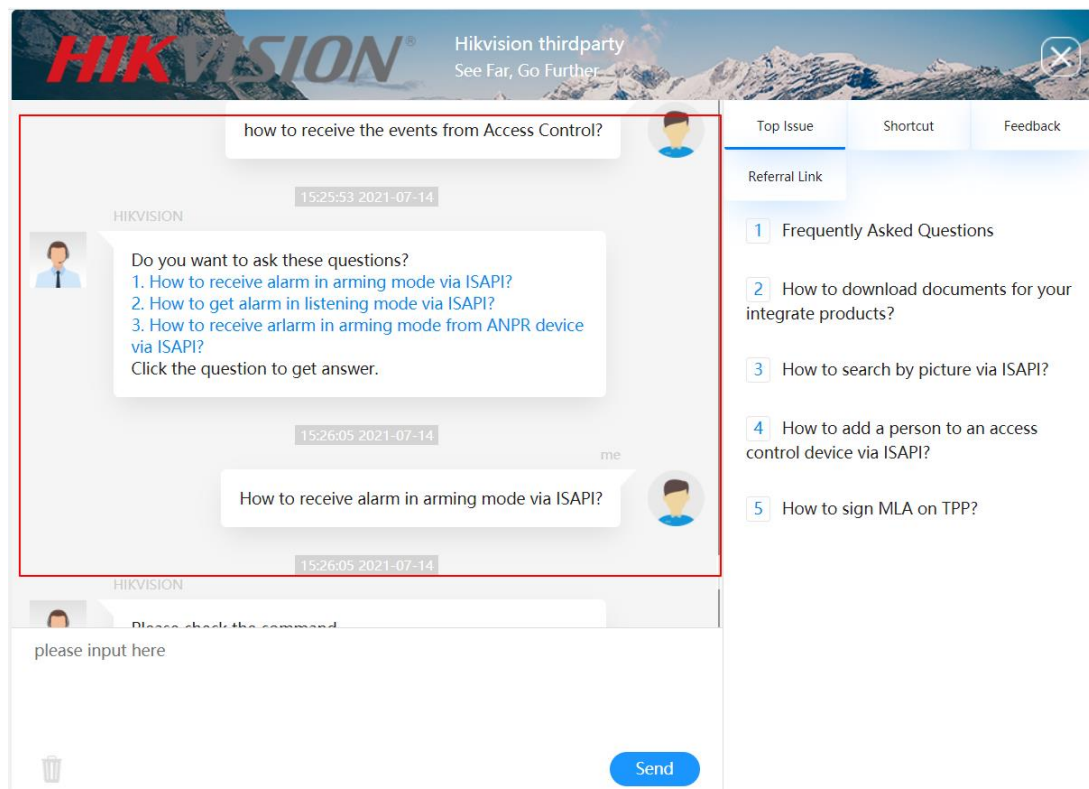

1. Log in to TPP, and then click the floating window **Online Support** in the bottom right corner.

2. **Online Support** supports online robot Q&A at present, it has summarized a large number of basic questions, and is still improving, and its function will be more and more powerful. You can try to use the online robot to ask some common problems. The online robot will quickly give solutions to these common problems, which can shorten the support time and improve efficiency.

3. You can directly click on the existing displayed questions, or enter questions in the input box to obtain answers.

2.2 Submitting cases

If the answer of online robot can't meet the your needs, you can seek the help of technical

support. You can submit a case on the TPP, and the technical support will help solve the problem after receiving the case. The steps are as follows:

1. Click the **Online Request** item on the left to enter the online case page

Top navigation: konggujushi1@163.com, HOME, MY ACCOUNT, PROGRAM, PARTNER, SOLUTIONS, PRODUCT NEWS, INTEGRATION, EVENTS, RESOURCE.

User: Dennis Zhang (konggujushi1@163.com)
Company Name: Adler Technology, Country: United States, Partner Type: Solution Partner

Left sidebar: DASHBOARD, ONLINE REQUEST, INTEGRATION LIST, SOLUTION MANAGER, HEOP MANAGER, INTEGRATION PROJECT.

Search bar: Enter Keyword, Search, Status: All.

Case List:

Case ID	Creation Date	Question Type	Status
TestCase001	2021-06-04	ISAPI	Processing
Hivision Test	2021-06-02	ISAPI	Awaiting HikVision's response

2. Click the **Add** button to start filling in the specific problem type and problem description. Please be sure to describe the problem clearly, so that our technical support can accurately answer the problem and improve efficiency.

Case Form

Fields:

- * Title
- * Question Type
- * Development Language
- PROJECT
- * Description

Buttons: Back, Submit.

3. If there is a problem in submitting the case, such as an error reported by the website. Please contact your local technical support for help.

2.3 Email for help

Email:

1. If you cannot use the above two methods, they can write an email to local technical support for help. If the local technical support cannot solve the problem, they will transfer the email to the HQ 3rd party integration group.
2. Please give the project information as detailed as possible so that we can increase efficiency.
