Chapter 1 Introduction

1.1 Overview

iVMS-4200 Client software is designed to configure and manage Hikvision devices in a unified and intuitive manner, including DVRs, NVRs, IP cameras, encoders, decoders, security control panels, video intercom devices, access control devices, etc.

The software provides multiple functionalities including live view, video recording, remote search and playback, file backup, alarm receiving, person management, access control, video intercom, security control, time & attendance, etc.

1.2 Version

Version	Date
iVMS-4200 V3.12.1	2025-01

1.3 Components

Component	Version	Date of Release	Latest Version or Not
Player	V7.4.2.62	2024-10-21	Yes
Network SDK	V6.1.10.5	2024-12-16	Yes

Chapter 2 What's New

2.1 Live View

2.1.1 Updated Features

On the Main View page, optimizes the right-click menu and toolbar for live view of access control devices to display only supported features.

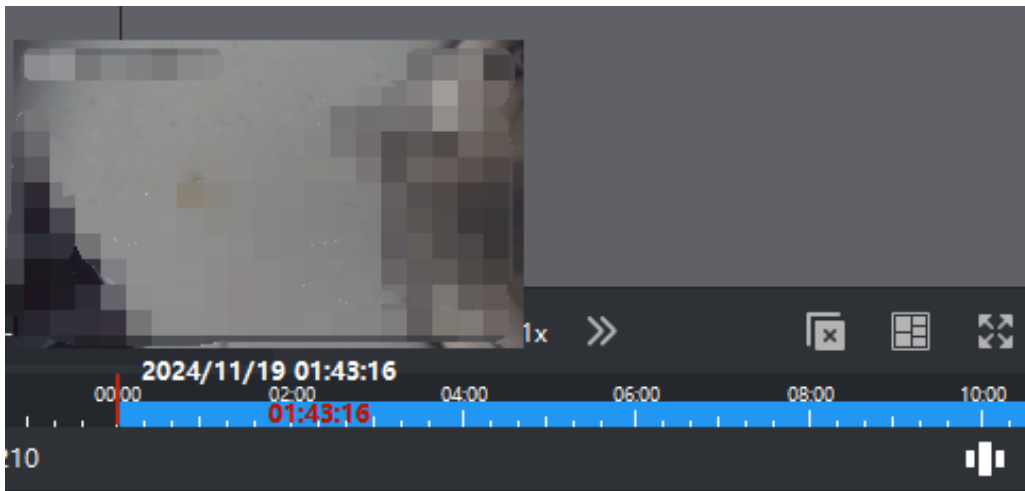

2.2 Remote Playback

2.2.1 Added Features

Adds the feature of keyboard control. “Space” indicates starting or pausing playback. “Left/Right Arrow” indicates rewinding or fast forwarding one frame.

2.2.2 Updated Features

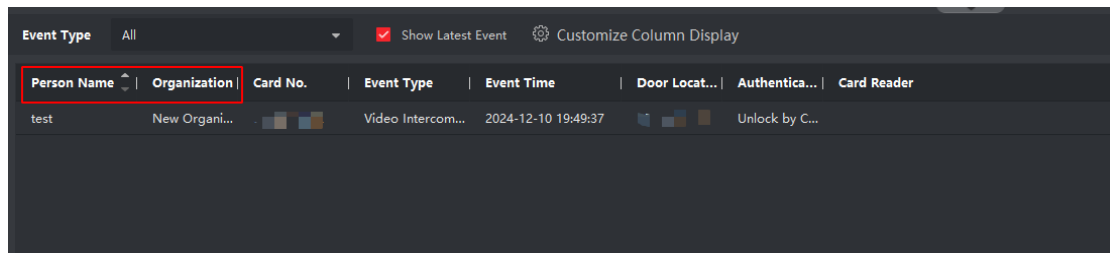

Adds the feature of displaying the timeline on thumbnails.

2.3 Monitoring

2.3.1 Added Features

1. For access events via card, supports displaying person name and organization.

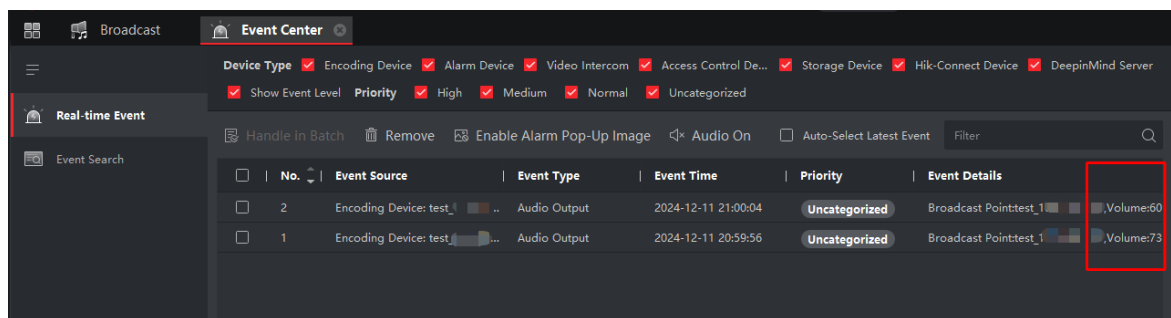

Person Name	Organization	Card No.	Event Type	Event Time	Door Locat...	Authentica...	Card Reader
test	New Organi...		Video Intercom...	2024-12-10 19:49:37		Unlock by C...	

2. Supports receiving and displaying palm print authentication events, such as access denied by palm print.

2.4 Event Center

2.4.1 Added Features

1. Supports receiving and displaying the volume change alarms reported by the broadcast device.

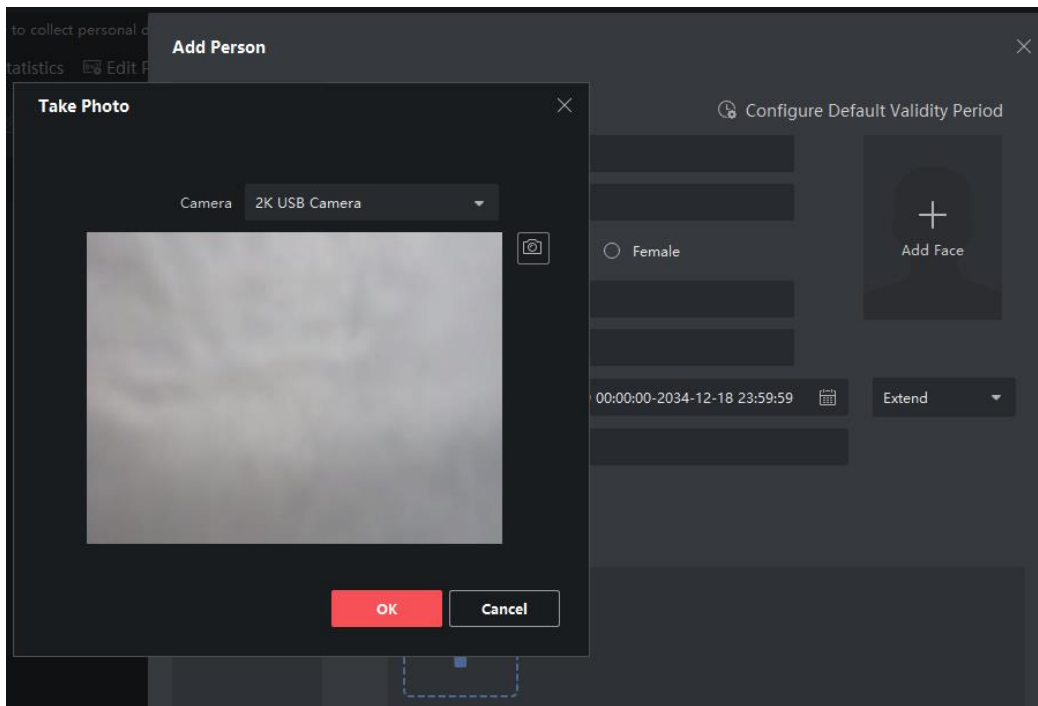

No.	Event Source	Event Type	Event Time	Priority	Event Details
2	Encoding Device: test_1	Audio Output	2024-12-11 21:00:04	Uncategorized	Broadcast Pointtest_1 Volume:60
1	Encoding Device: test_1	Audio Output	2024-12-11 20:59:56	Uncategorized	Broadcast Pointtest_1 Volume:73

2. Supports receiving and searching palm print authentication events, such as access denied by palm print.

2.5 Person Management

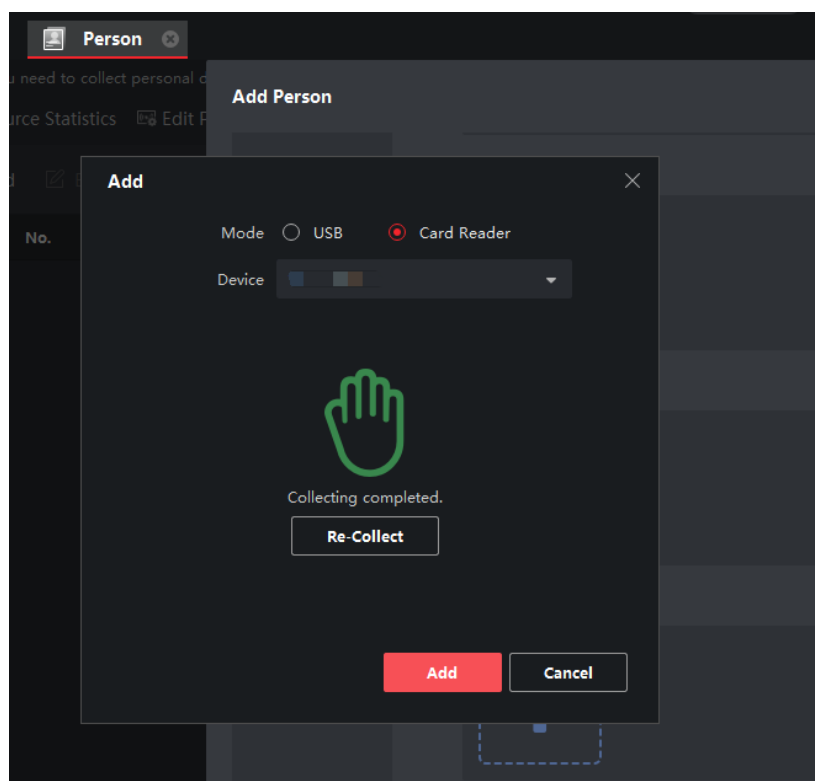

2.5.1 Updated Features

- Optimizes the feature of taking photos via USB camera, supporting live view and face capture.

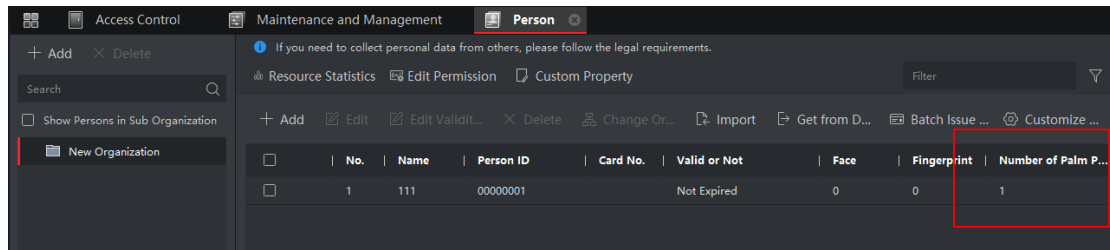

2.5.2 Added Features

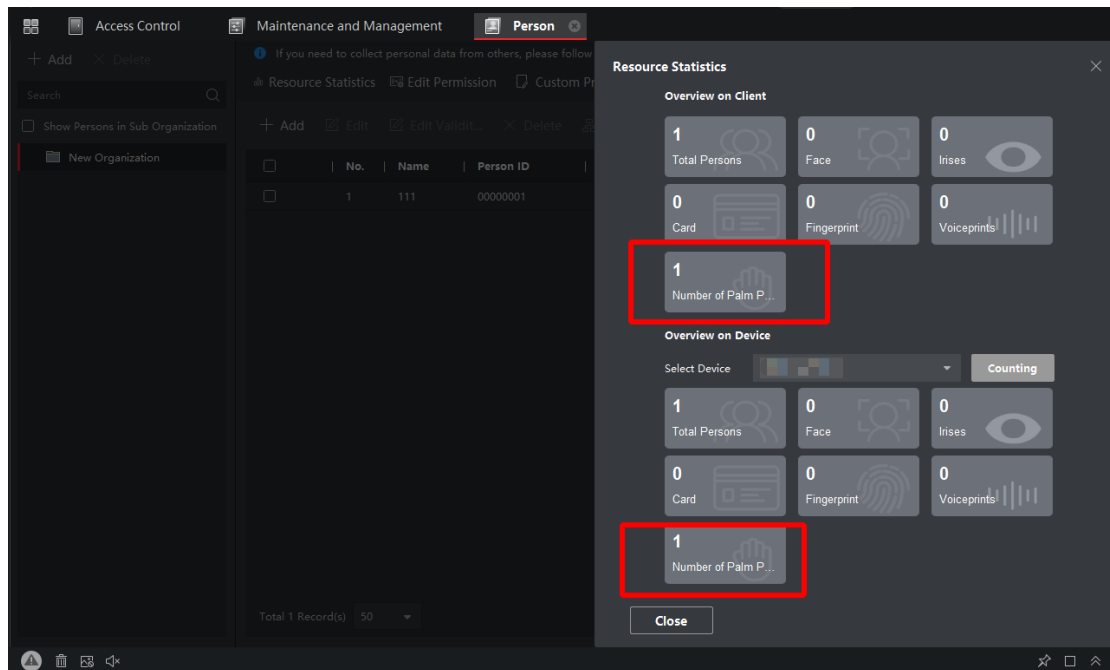

1. On the Add Person page, supports collecting palm prints by the palm print collector connected to the Client via USB and access control devices (remote collection).

2. Supports getting palm print data from access control devices.

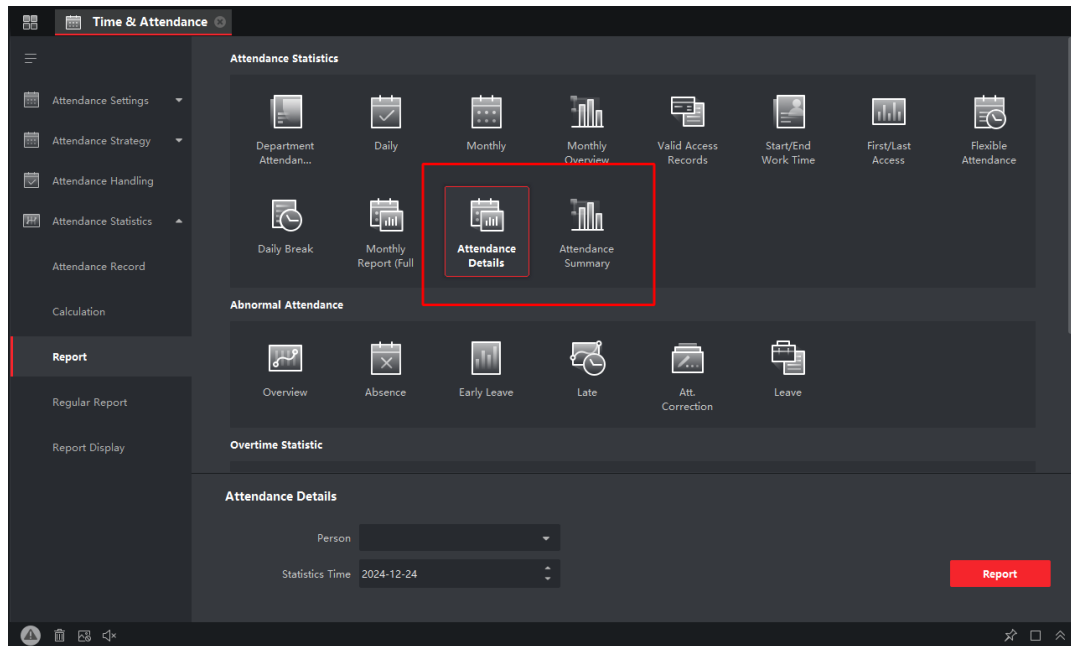

3. On the Resource Statistics page, supports counting the number of palm prints.

2.6 Time & Attendance

2.6.1 Added Features

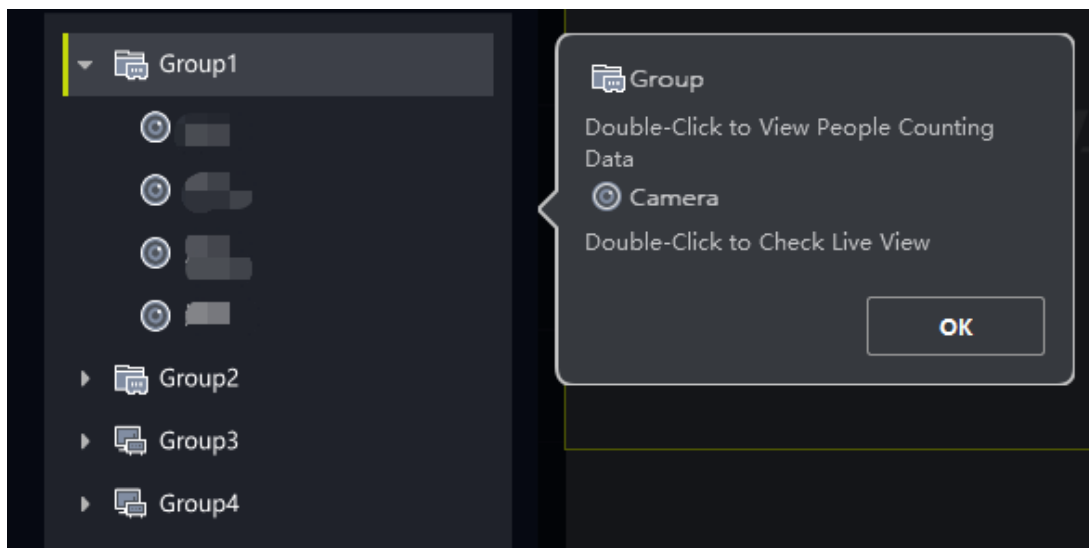

On the Report page, adds two types of reports: Attendance Details and Attendance Summary.

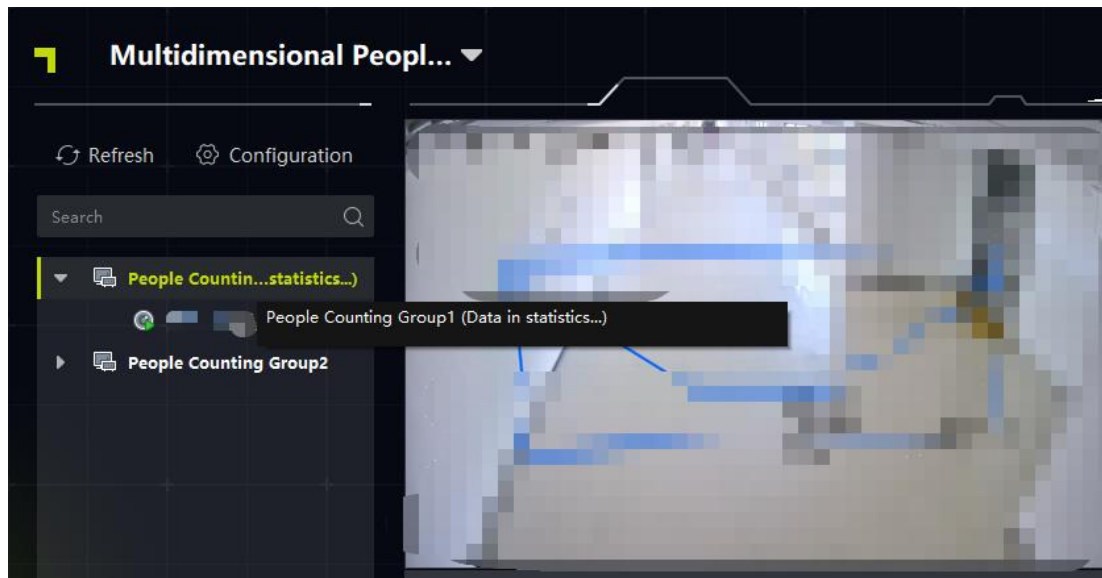

2.7 AI Dashboard

2.7.1 Updated Features

On the Multidimensional People Counting page, adds operation guidance and icons for the channels during live view and the groups being monitored.

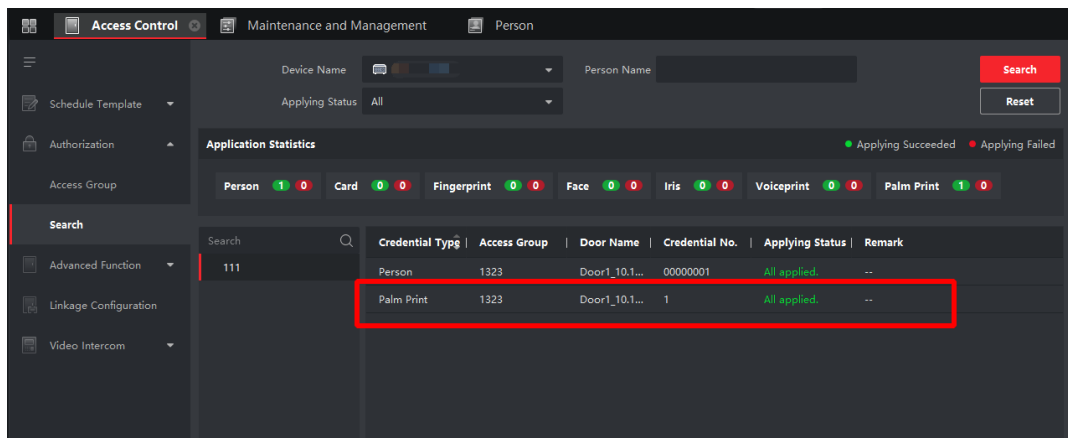

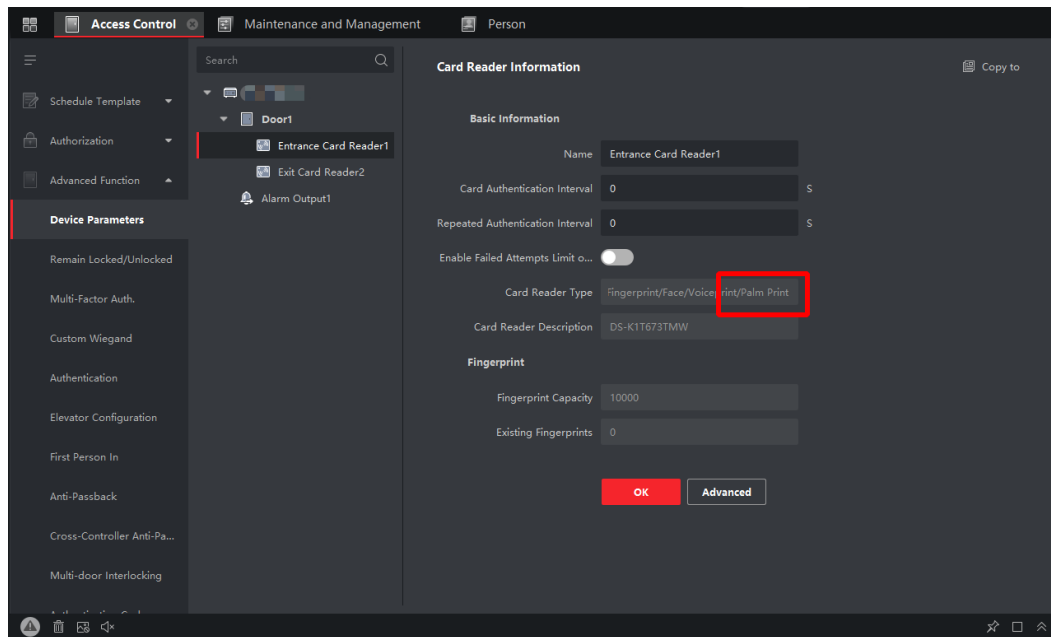

2.8 Access Control

2.8.1 Added Features

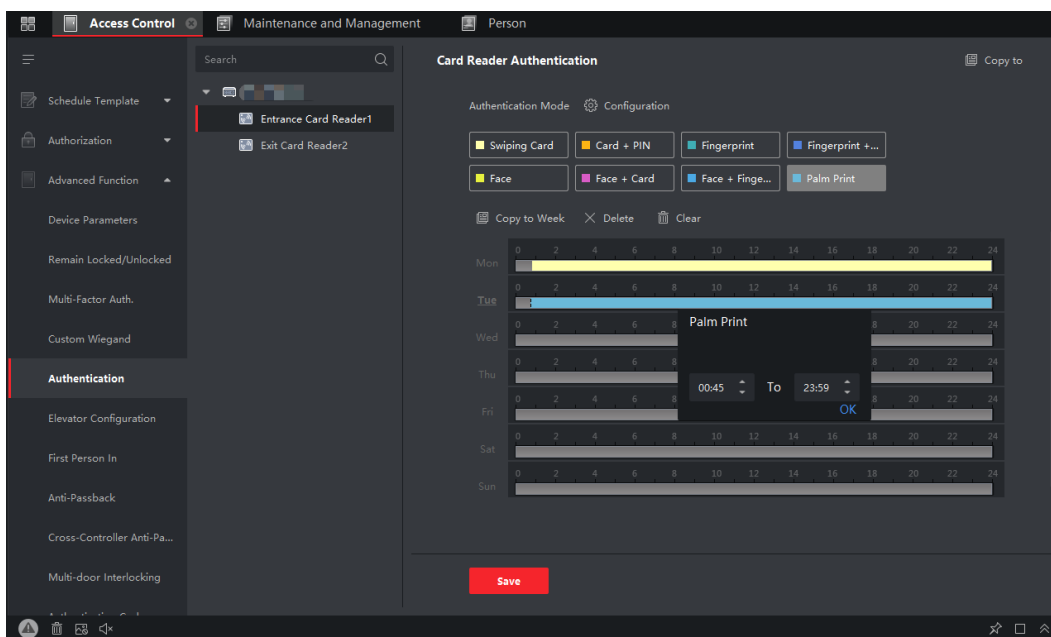

1. On the Authorization page, supports applying palm prints and checking applying status.

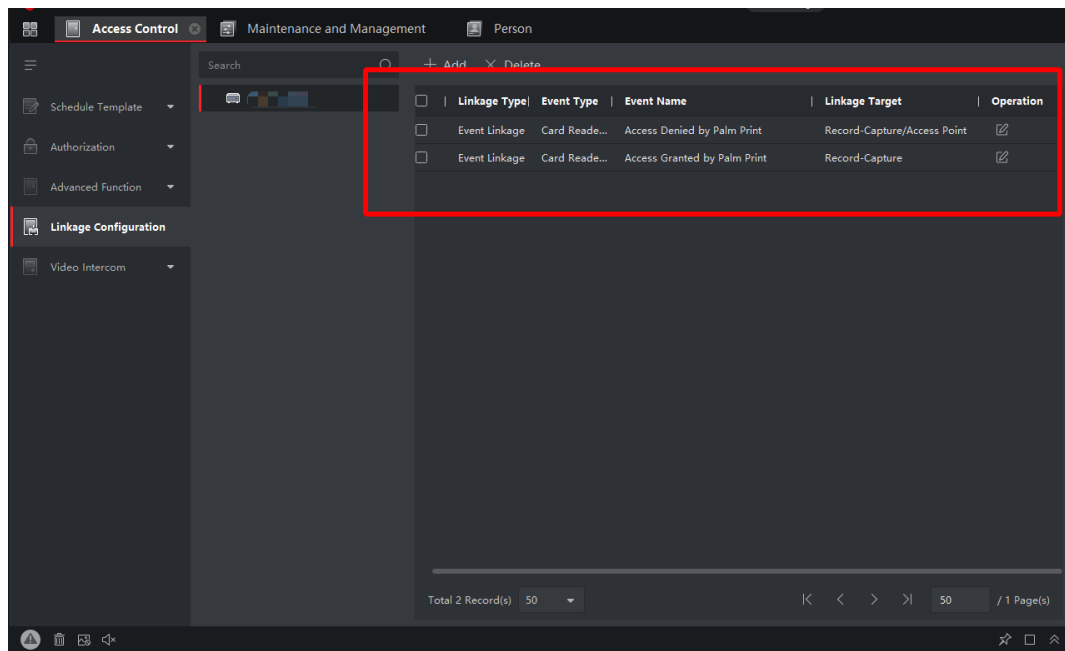

2. On the Device Parameters page, supports configuring parameters for card readers that support palm print authentication.

3. On the Authentication page, supports configuring palm print authentication and related schedule.

4. On the Linkage Configuration page, supports configuring palm print events.

2.9 Broadcast

2.9.1 Added Features

After the Client receives a volume change alarm from the broadcast device, opening the volume adjustment page or the batch volume adjustment page will update the volume to match the alarm.

Chapter 3 Resolved Issues

The following are issues resolved in this version.

No.	Issue
1	Personnel permissions cannot be synchronized to the access control security module.
2	After obtaining the alarm input/output, the camera status cannot be refreshed.
3	Unable to control the alarm output with an error message indicating no permission.
4	Real-time broadcast and emergency broadcast are not working for some broadcast devices when directly connected.

See Far, Go Further
